

Condition monitoring and performance analysis

Scandic Diesel is the Canadian representative for LEHMANN & MICHELS GmbH (LEMAG) who manufacture diesel, gas, steam and compressor engine condition monitoring and performance analysis systems for the marine industry.

LEHMANN & MICHELS specialise in engine Mean Indicated Pressure (MIP) systems for performance reporting and Condition Based Maintenance (CBM). The MIP range includes electronic indicators, MIP calculators and permanent computerized MIP systems that enable 24hr engine monitoring to shaft power measuring systems. LEHMANN & MICHELS' engine condition and performance analysis systems enable their customers to achieve optimum power and energy use and to enable the customer to carry out
